

CCELL TH001-P Disposable Filling Instructions

1. Insert a blunt tipped needle in the space between the airway + the outer wall of the cartridge and fill with 0.5ml of oil.
 - Cartridge must be UPRIGHT when filling the reservoir with oil.
 - DO NOT overfill or allow oil to enter the center air pathway.
 - Recommended Fill Temperature Range: 90 Fahrenheit to 140 Fahrenheit
2. Immediately after filling, insert and press fit the mouthpiece until it is fully sealed.
 - Failure to insert the mouthpiece immediately may cause leakage.

Mouthpiece

Usage

Please wait at least 30 minutes before using to allow the atomizer to saturate fully for the best vapor production and flavor.

Caution

- If overfilled, when pressing on the mouthpiece, oil will overflow and drip down into the cartridge. Wipe with alcohol immediately.
- If overfilled, cartridges exposed to higher - temperatures than when filled will cause the oil in the disposable to expand and leak.
- Warranty on all cartridges are void if these filling instructions are not followed.
